

—Institutional Effectiveness Summary for Administrative Units—
“The institution must demonstrate planning and evaluation in its administrative and educational support services ... Each unit, in its planning and evaluation processes, should consider internal and external factors and develop evaluation methods which will yield information useful to the planning processes of that unit.” SACS 1998

Unit Mission:	Performance Indicators	Performance Measurements	Measurement Results
<p>Facilities Planning strives to provide the best overall facilities delivery system within the State University System by providing services in support of the educational, research, and service mission of the University. Major areas of responsibility include: architectural programming, design development and management, construction management and master planning. The continuing goal is to develop and maintain a methodology which ensures an efficient, cost effective, professional department that is on time and within budget in the overall administration of projects.</p>	<ol style="list-style-type: none"> 1. Generate building programs which directly assist in the development of highly functional buildings that address the needs of the university. 2. Efficiently manage the design and construction of buildings which are aesthetically pleasing, functional, and easy to maintain. 3. Produce a more coherent and effective master plan that is responsive to the anticipated needs of the university. 	<p>A survey of at least 75% of our campus clients regarding their satisfaction with facilities development.</p> <p>Survey of campus clients regarding their satisfaction with their impact on campus facilities design.</p> <p>A survey of at least 75% of our campus clients concerning their level of satisfaction with the extent to which their input was included in the design of the Campus Master Plan.</p>	<p>1.a.
